EXECUTIVE SUMMARY

Strategic thinker with more than 10 years of industry expertise. Holds a graduate degree in the epistemology of psychiatry, which explores how knowledge is acquired and its impact on medicine and patient experience. . Brings a cross-discipline perspective to the healthcare industry and believes in taking action to improve it. Proven ability to tackle technical and commercial challenges, driven by a desire for medicine to be patient-focused and a commitment to making a difference.

WORK EXPERIENCE

May 2020 - February 2024
Ixcio Digi Health, Johannesburg

Co-Founder

Defined product vision, roadmap, and strategy to drive development of a cutting-edge medication reminder app. Led cross-functional team of designers, developers, and stakeholders to prioritize features and deliver a high-quality product. Conducted user research and testing to gain insight into user needs and behaviors. Managed the product backlog and ensured product was delivered on time and met quality standards. Communicated with stakeholders and partners to keep them informed of product development progress.

January 2014 - Present
Kalkheuveld West Residents and
Landowners Association

Co-Chairperson since January 2022

Leadership role responsible for direction for the Safety and Environmental Committees within KWLRA . Development and execution of strategies to address key safety and environmental concerns in the community. Acts as a liaison between residents and the committee to resolve problems and address issues related to the committees' activities. Ensures that all committee activities align with the overall goals and objectives of the KWLRA organization. Demonstrates strong leadership and communication skills in leading KWLRA to achieve their goals and make a positive impact in the community.

January 2014 - November 2015
Cohred, Switzerland

Business Development Consultant

COHRED is an international non-governmental organisation Employed to manage the product and business development of RHINNO – a platform to streamline the regulatory approval process for health research. Engaged with stakeholders at various universities and national research ethics committees in Africa to assist with needs analysis in terms of the implementation of the RHInno platform and alignment with international best practices for Ethics Committees.

2013
Pharma-Ethics

Operations Manager

I worked on the implementation of the RHInno platform for Pharma Ethics. This entailed liaising with COHRED as well as various CRO's in South Africa.
